**Talk Title: High Volume Silicon Photonics for Co-Packaged Optics and Optical I/O**

Thomas Liljeberg is Sr. Director in the Silicon Photonics Products Division at Intel Corporation, where he is responsible for the integrated and co-packaged photonics product and technology roadmap. From 2004 to 2015, he was at Source Photonics serving in various roles in Product Management and R&D management, most recently as Executive VP of Product Line Management. Prior to Source Photonics, he was with Agility Communications. Thomas Liljeberg holds a Ph.D. degree in Electrical Engineering from University of California, Santa Barbara, and a MSEE from Technical University of Denmark.
