

**Robert Ober**  
**Chief Platform Architect**  
**Datacenter Products**  
**NVIDIA**

Rob is Chief Platform Architect of NVIDIA's data center products, and works with global Hyperscales to architect AI and Deep Learning clusters, develop systems and platform architecture, and influence NVIDIA hardware and software platform roadmaps. His background is in processor and system architecture, with experience in networking, storage, memories, and wireless. Rob has over 40 international patents in processor architecture, low power design, storage, networks, wireless, and mobile devices.
