

Mead Rusert
President
Automated Logic Corporation

Mead Rusert is President of Automated Logic, a leading provider of innovative building automation and energy management solutions that maximize energy efficiency and ensure occupant comfort and engagement. With over 30 years of industry experience, he brings a broad background to the position including executive roles in engineering, product management, and marketing for commercial HVAC products at Carrier Corporation. He holds three patents related to temperature control algorithms.

Mead earned a Bachelor's degree in mechanical engineering from the University of Wisconsin-Madison and a Master's degree in business administration from the Fuqua School of Business at Duke University.
